Eager to begin my career with an internship where I can apply my technical foundation, actively learn, and provide my full support to the team. Ready to contribute my skills and enthusiasm to help achieve project goals and drive impactful results.

Projects

Admin-Managed Blogging Platform 🔗

- A modern, fully responsive blogging platform built with the MERN stack and Firebase Authentication. This application is tailored for admin-controlled blogging, ensuring centralized content management while fostering user engagement through comments.
- Admin-Only Blog Posting: Admins have exclusive control over creating blogs, with a default image ensuring consistent visuals.
- User Interaction: Users can post, edit, and delete comments, enabling dynamic discussions.
- Admin Dashboard: Provides insights and control over comments, users, likes, and posts.
- Cross-Platform Compatibility: Accessible on mobile and desktop, with cross-origin support for seamless connectivity.

Mini E-Commerce Website 🔗

- I developed a fully functional mini e-commerce website using the MERN stack. The frontend is built with React and styled using Tailwind CSS, providing a modern and responsive design. The backend is powered by Node.js and Express, with MongoDB as the database for efficient data management.
- Add to Cart Functionality: Users can seamlessly browse products and add items to their cart for purchase.
- Responsive Design: The website offers a smooth user experience on both mobile and desktop devices.
- Backend API: Developed RESTful APIs for handling product data, user authentication, and cart management.
- Database Integration: MongoDB stores user and product data securely and efficiently.

Education

East Point College of Higher Education

2022-2025

- Bachelor of Computer Application

Skills

- HTML
- Tailwind CSS
- JavaScript
- React.js
- Redux Toolkit
- Node.js
- Express.js
- MongoDB
- Git & GitHub
- Firebase
